

Semi Synthetic

Formulation

IT'S MORE THAN JUST OIL. IT'S LIQUID ENGINEERING.

Up to 75% of engine wear happens while your engine warms up. When the engine stops oils drain off critical engine parts, however Castrol Magnatec's Intelligent Molecules don't, they cling to the engine like a magnet providing an extra layer of protection ready to protect from the moment you turn the key.

Castrol Magnatec's molecules are always there, always ready, dramatically reducing* engine wear when the most damage happens; as your car warms up.

Castrol Magnatec. Instant protection from the moment you turn the key.

Castrol Magnatec's Intelligent Molecules:

- Cling to critical engine parts when the oil drains down.
- Cling to your engine forming an extra layer that protects during start up and beyond.
 - Bond to metal surfaces to make engine parts more resistant to wear.
- Are combined with synthetic technology to provide increased protection in high and low temperature applications.
 - Provide continuous protection for all driving conditions, styles and temperatures.

* As tested against the industry Sequence VA wear test

Meets and exceeds API SM

Manufactured by NetLube Iran in QFA under the
